TODAY'S BEST INVESTMENT FOR SMALL SAVERS

NATIONAL  
SAVINGS  
CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income.

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000 and two joint holders upto Rs. 50,000/-

Deposits accepted in multiples of Rs. 100 upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per annum, free of income-tax and super-tax and which is not taken into account in assessing the total taxable income, is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay, Calcutta, Delhi and Madras and Branches of the Imperial Bank of India at other places transacting treasury business. Deposits are also accepted at all Treasuries in Part 'A' States at places where the Imperial Bank does not transact treasury business and at all Sub-Treasuries in Part 'A' States; also at Treasuries at Bhuj (Kutch), Imphal (Manipur) and Coorg-Mercara (Coorg).

3½%

TEN-YEAR  
TREASURY SAVINGS  
DEPOSITS

For further information and/or rules governing these investments please write to the Provincial National Savings Officer of your State or the National Savings Commissioner, Gorton Castle, Simla-3.

Reported attacks and deaths from cholera, smallpox, plague and typhus in districts in India during the week ending the 19th September, 1953.

REMARKS

The figures of births and deaths shown in this statement for week ending the 12th September, 1953, relate to 188 towns with an estimated population of 24,380 thousands. The total number of towns is 296 and their population is 36,140 thousands. Thus 64% of the total number of towns representing 67% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 17,495 and 8,512 representing birth and death rates of 37.3 and 18.2 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 174 towns with an estimated population of 22,332 thousands. Information about Ajmer, Bhopal, Bihar and West Bengal could not be included. The total number of towns is 250 and their population is 30,790 thousands. Thus 70% of the total number of towns representing 73% of the total population is covered. The numbers of births and deaths

recorded in these towns were 16,722 and 8,075 representing birth and death rates of 39.3 and 18.8 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(B) States (Part B).—The data here relate to 14 towns with an estimated population of 2,048 thousands. The total number of towns is 46 and their population is 5,350 thousands. Thus 30% of total number of towns representing 38% of total population is covered. The numbers of births and deaths recorded in these towns were 773 and 437 representing birth and death rates of 19.5 and 11.1 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.

† Figures not available.

Explanation of symbols used :—B.=Births ; B.R.=Birth Rate ; C.=Cholera ; S.=Smallpox ; P.=Plague ; F.=Fever ; D.D.=Dysentery and Diarrhoea ; R.D.=Respiratory Diseases ; M.D.=Maternal Deaths ; D.R.=Death Rate ; I.D.=Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 19th September 1953, relate to 127 towns with an estimated population of 18,480 thousands. The total number of towns is 296 and their population is 3,140 thousands. Thus 43% of the total number of towns representing 51% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 13,452 and 6,279 representing birth and death rates of 37.9 and 17.7 per thousand of population respectively.

(A) States (Parts A & C) :—The data here relate to 102 towns with an estimated population of 15,424 thousands. Information about Ajmer, Bihar, Madras, Orissa and West Bengal could not be included. The total number of towns is 100 and their population is 30,790 thousands. Thus 41% of the total number of towns representing 50% of the total population is covered. The numbers of births and deaths recorded in these towns were 11,798 and 54,31 representing

birth and death rates of 39.8 and 18.3 per thousand of population respectively. The table at the end gives the position by States.

Achalpur in Madhya Pradesh was the only town which had a high death rate of 53.4 per thousand of population and the high death rate was mainly due to deaths from fevers, dysentery and diarrhoea.

(B) States (Part B) :—The data here relate to 25 towns with an estimated population of 3,050 thousands. The total number of towns is 46 and their population is 5,350 thousands. Thus 54% of total number of towns representing 57% of total population is covered. The numbers of births and deaths recorded in these towns were 1,654 and 848 representing birth and death rates of 33.6 and 15.3 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
